

PRODUCT SPECIFICATION REPORT

Cold Galvanize is an aerosol spray designed as a zinc primer and a two-way protective barrier against rust and corrosion that seals out air and moisture.

COLD GALVANIZE COATING

PROD.#0190

Heavy Duty, Industrial Grade Cold Galvanize Aerosol

FEATURES/BENEFITS:

Heavy Duty	Cold Galvanize is resistant to salt, rust, corrosion, and water due to it's high solids zinc content.
Easy to Use	Aerosol packaging gives a convenient method for applying heavy duty galvanizing protection on iron, steel, and aluminum.
Safer Solvents	Cold Galvanize contains no chlorinated solvent, CFC's, or other ozone depleting compounds.

APPLICATIONS:

Cold Galvanize is an excellent primer, rust and corrosion protector for steel, iron, and other metals. It is excellent for use in shipyards, and other areas where corrosion protection is needed such as: Automotive Repair Shops, Fabricated Metal Products, Industrial Machinery Manufacturers, Plumbing, Heating and Air Conditioning, and Steel Mills and Welding Services.

COMPANION PRODUCTS:

Aerosolve II, Big Orange, I.D. Red, Solv, Grip, Reach, MVP, I.D. Clean, Flash, Fast Gasket, Orange Gel Degreaser, Zep 45

SPECIFICATIONS:

Physical Form	Aerosol
Color	Zinc
Flammability	Extremely Flammable by CSMA Flame Extension
Shelf Life	1 Year Minimum
D.O.T. Shipping Label	ORM-D

PACKAGING:

16 oz. Aerosol
