

PRODUCT SPECIFICATION REPORT

DIESEL FUEL ADDITIVE™

Concentrated Diesel Fuel and Fuel Oil Additive for Low Sulfur Fuels

DESCRIPTION

Zep Diesel Fuel Additive is a concentrated fuel stabilizer including excellent flow and cetane improvers. Formulated and blended to achieve the right combination of performance characteristics and lubricity.

FEATURES

- Flow Improvement
- Diesel Ignition Improvement
- Anti-Oxidant
- Gum Dispersant
- Corrosion Inhibitor
- Lubricity Additives

BENEFITS

- Modifies wax crystals preventing low temperature flow and filter plugging problems
- Raises the cetane performance of the fuel resulting in easier starts and better operation
- Improves the stability and quality of fuel during storage and retards fuel deterioration that may occur during long term storage
- Prevents deposits of insoluble gums in the fuel system and on internal parts, particularly diesel injectors
- Moisture displacing corrosion inhibitor protects fuel storage tanks and engine fuel system components from rust and corrosion damage
- Two lubricity additives prevent fuel system wear

TECHNICAL SPECIFICATIONS

The specific level of performance enhancement achieved when using Zep Diesel Fuel Additive is dependant upon the properties of the fuel to which it is added. The following specifications are based on typical performance results obtained upon addition to No. 2 Diesel Fuel at a 1:1000 ratio, but cannot be guaranteed due to fluctuations in fuel quality.

Cetane Number5 point increase
 Pour Point15°F decrease
 Cold Filter Plug Point5°F decrease

COMPANION PRODUCTS

SPECIFICATIONS

Physical Formthin, solvent-based liquid	Flash Point 117°F
Colorclear, colorless	pH N/A
Odorhydrocarbon	Shelf Life 1 year minimum
Specific Gravity0.81	D.O.T. Shipping None

PACKAGING

Quarts
6-gallon pail
55-gallon drum
