

## PRODUCT SPECIFICATION REPORT

# FORMULA 166™

## Long-Lasting Exterior Protective Coating

### DESCRIPTION

Clear, exterior, acrylic coating. Consists of a blend of acrylic resins and plasticizers dispersed in a fast drying aromatic solvent.

### FEATURES

- Protects
- Beautifies
- Waterproofs
- Fast drying
- Long-lasting
- Easy to remove
- East to use

### BENEFITS

- Seals metal surfaces and paints from the corrosive effects of wind, water, air, salts, acids, and alkalis.
- Dries to a clear, glossy, non-yellowing finish that is hard, non-tacky, and non-combustible.
- Seals moisture out of electrical wiring, printed circuitry, and other sensitive parts.
- Dries to the touch in 10 - 15 minutes.
- Lasts up to two years out-of-doors. Will not crack, craze, or yellow.
- Dissolves rapidly in Zep Teen or similar solvents.
- Apply by brushing or spraying.

Note: Caution: Test before using to insure compatibility of paint and product. Solvents may crack, craze, or otherwise affect certain paints and plastics.

### APPLICATIONS

Use to beautify, protect, and restore both painted and unpainted metal parts. Use to seal, waterproof, and protect wiring and other electrical components. Use to seal and protect any surface exposed to wind and weather.
