RUST ERASER™

**A ready-to-use neutral, non-acid,
non-caustic rust remover**

DESCRIPTION

A new breakthrough formulation designed to remove rust without containing any type of fuming acid.

FEATURES

- Non-Corrosive
- Non-Fuming
- Effective
- Fast Acting
- VOC Compliant
- Safe
- Non-Flammable
- Prevents Flash Rusting

BENEFITS

- A neutral formulation that is non-corrosive to the base metal
- Contains no acid to cause fumes
- Works at the same pace as any acid product without the hazards
- Removes rust without any scrubbing
- Meets applicable State and Federal VOC regulations
- Safe for users and safe on the materials it is used. Does not remove most non-oxide coatings including paint and chrome
- No flash point
- Keeps clean parts from flash rusting once dipped in this product

APPLICATIONS

Rust Eraser can be used on iron, steel, chrome, copper, brass, aluminum, equipment, tools, construction equipment, chains or any type of industry that has rust problem.

RUST ERASER

NEUTRAL RUST REMOVER

Zep Rust Eraser safely removes rust from iron and ferrous-based alloys. It is a neutral, non-acid, non-caustic rust remover. With normal recommended use, Zep Rust Eraser will not harm most non-oxide coatings including paint and chrome and will not damage copper, brass, aluminum, plastic, or rubber. Prior to using Zep Rust Eraser the product should be tested in an inconspicuous location for any potential damage to the surface.

DIRECTIONS:

Fully immerse the rusted parts into Zep Rust Eraser after removing loose soils, oils, and greases. Soak until rust is removed. Stainless steel or plastic containers are recommended for soaking parts in Rust Eraser; steel or galvanized steel containers are not recommended. Heating is not required. Some materials may develop etching at the liquid/air interface if not fully immersed. Surface rust can be removed in less than 30 minutes. More heavily rusted parts may require up to 4 hours. Soaking overnight may be necessary for severely rusted parts. Avoid soaking parts for more than 24 hours. After rust is removed rinse thoroughly with water before applying paint or other coatings. To prevent short term flash rusting cleaned parts can be dipped in fresh Zep Rust Eraser and allowed to dry.

CAUTION

CAUSES EYE IRRITATION

Can cause eye irritation. Zep advocates limiting exposure to all chemical products. DO NOT swallow this product. Zep recommends wearing goggles or safety glasses during product use and handling. The use of rubber, neoprene, nitrile, or other resistant gloves is recommended for

prolonged use. Remove contaminated clothing promptly and DO NOT rewear until thoroughly cleaned. After handling, wash hands thoroughly with soap and water.

FIRST AID:

EYES: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if irritation persists.

SKIN: Flush contaminated skin with plenty of water. Consult a physician if irritation develops.

INHALATION: If symptoms occur, move exposed person to fresh air. If symptoms persist, get medical attention.

INGESTION: If this product is swallowed, DO NOT induce vomiting. If affected person is conscious give plenty of water to drink. Call a poison control center or doctor immediately for treatment advice.

DISPOSAL AND/OR SPILL INFORMATION: As with all cleaning and maintenance procedures, run-off from the cleaning or maintenance process should be diverted to a collection vessel, or where permitted, to a sanitary sewer (consult local and state regulations) and not allowed to soak into the ground or to enter a storm sewer. If this product is spilled or contaminated and cannot be used, creating the need for disposal, absorb product on an inert absorbent material, such as Zep-O-Zorb or Zep Super Sorbent, and deposit in a sealable container. Rinse area well with water.

STORAGE: Keep this product away from food and food products. Store tightly closed container in dry area at temperatures between 40°F (4°C) and 120°F (49°C).
