

# THE RIGHT COIL CLEANER FOR THE JOB

## For Individual Units:

### #0202 Zep Foaming Coil Cleaner

- Recommended for individual units or limited access areas
- Convenient aerosol application
- No rinse required—apply and turn air conditioner on after one minute of contact time
- Safe for use on aluminum and other soft metals

### #5365 R-8058

- Formulated for heavy duty cleaning
- Non-aerosol Ready-to-Use
- Requires water rinse
- Limit contact time to 2-5 minutes
- Use with Zep 6400 trigger sprayer

## For Large or Multiple Unit Cleaning:

### #1203 Zep Formula 448

- Recommended for routine maintenance of air conditioner coils
- Concentrated heavy-duty detergents, solvents, and alkalis
- Dilute 1:1 with water
- Safe for frequent use on aluminum and other soft metals
- Produces rich foam that clings to coils for optimal cleaning
- Rinse with water after 2-5 minutes of contact time
- Apply with the Zep Pump-Up Foamer #M79401

### #5747 R-6394 One Step Coil Cleaner

- Designed for routine maintenance of air conditioner coils
- Concentrated formula dilutes 1:6 with water
- Formulated to produce rich foam
- No rinse required
- Turn on air conditioner after 5 minutes of contact time
- Apply with the Zep Pump-Up Foamer #M79401

## Professional Strength:

### #5385 R-13672 Formula 7961

- Recommended for cleaning air conditioner units with scale build-up on the fins
- Excellent for cleaning air conditioner coils located within the range of lawn sprinklers
- Non-fuming, mild acid formula
- Produces medium foam
- Brightens metal
- Maximum contact time of 2-3 minutes; rinse with water
- Apply with the Zep Pump-Up Foamer #M79401

### #5557 R-10684

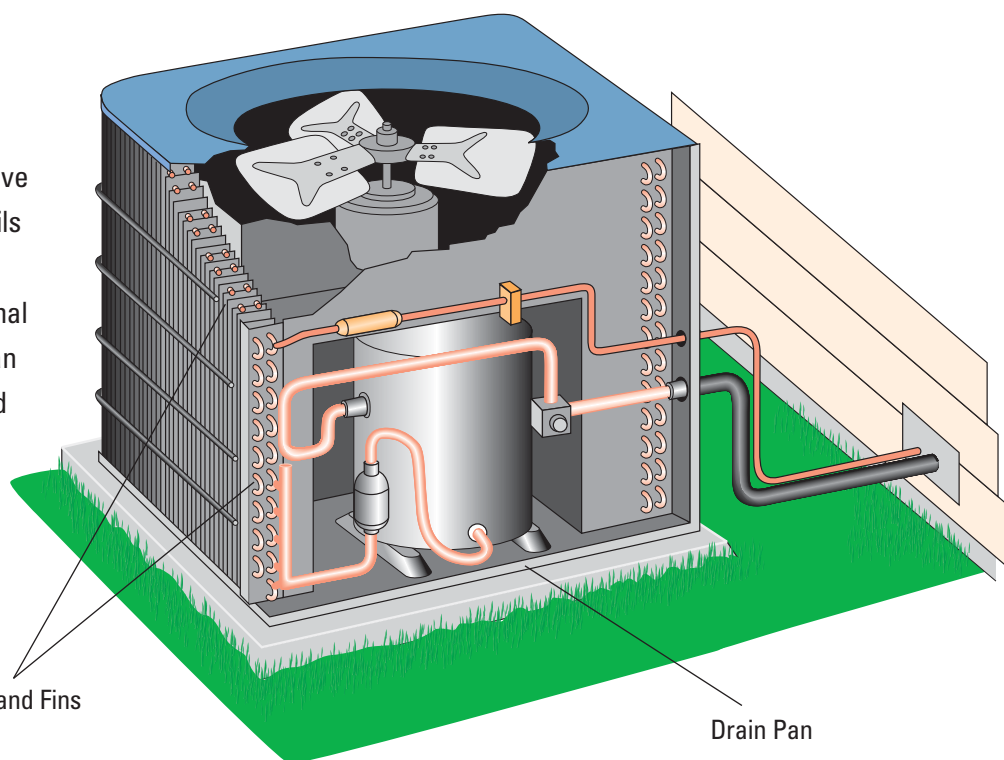

- Recommended for cleaning grease and oil build-up from air conditioner coils
- Heavy-duty concentrated caustic cleaner
- Dilute 1:50 with water for aluminum coil cleaning
- Maximum contact time of one minute; thorough water rinse required
- Brightens aluminum coils when used according to package directions
- Apply with the Zep Pump-Up Foamer #M79401

## Drain Pan Maintenance

Use Zep Tabs Plus (# 1300) to prevent the growth of bacteria and slime in air conditioner and refrigerator drain pans. Slime can block the drain hole, causing the pan to overflow and damage walls, ceilings, and floors. Zep Tabs Plus combat a broad spectrum of harmful bacteria including those that cause the common cold, asthma, fatigue, headaches, flu, allergies and Legionnaires Disease. Metered chemical release in a sealed, taper-proof housing results in 3 months service life. EPA registered.

## Get ready for the heat wave.

The dirt, dust, lint, and soils that have accumulated on air conditioner coils over the winter can prevent an air conditioner from operating at optimal efficiency. Routine coil cleaning can help you beat the summer heat and conserve electricity.
