

THE ZEP D-1000 DISPENSER

**EASY TO OPERATE.
HARD TO WEAR OUT.**

BUILT TO LAST

The Zep D-1000 Liquid Soap Dispenser is built to last a lifetime. Zep guarantees it. Constructed of sturdy aluminum, stainless steel and nylon, the dispenser is nearly indestructible. It won't rust, clog or corrode, even under heavy daily use. Use the D-1000 dispenser anywhere, from industrial washrooms and work stations to restrooms and showers, for dependable maintenance-free soap dispensing.

EASY OPERATION

The D-1000 dispenses soap with an easy-to-use, 4-position stainless steel lever. Set one of the four positions to control the amount of soap you want used for each hand-washing. Eliminates waste caused by over dispensing and saves you money. The easy access lever allows you to pump hand-cleaners with your hand, elbow or forearm for "no-mess" operation.

SIMPLE TO INSTALL

The durable nylon mounting bracket provides easy installation and secure positioning of the D-1000 on any wall surface. Once the bracket is in place, the dispenser just snaps into position. Hidden set screws secure the bracket to the wall, discouraging theft and vandalism. All hardware is supplied with the dispenser.

EASY TO REFILL

Zep's handcleaner containers make refilling the D-1000 quick and easy. Simply remove the empty container and a new full one will neatly snap into place. Each container is designed to show the amount of liquid remaining, so there's no guessing as to when a refill is needed.

EASY TO CLEAN

Just lift the D-1000 off the mounting bracket and the dispenser is ready for easy cleaning. The trouble-free stainless steel pump and spout will resist rust, corrosion and abrasion.

**THIS WILL BE
THE LAST
SOAP
DISPENSER
YOU'LL EVER
HAVE TO BUY.**
