

PRODUCT SPECIFICATION REPORT

Dry Graphite™ a top-quality dry lubricant that is ready-to-use. It coats metal and plastic surfaces with a microscopic, heat-stable film which provides excellent lubrication and protection from galling and fusion at extreme temperatures.

DRY GRAPHITE™ Aerosol Dry-Film Graphite Lubricant

PROD.#0164

FEATURES/BENEFITS:

Excellent Extreme Temperature Lubrication	Forms a conductive, heat-stable coating for excellent lubrication at temperatures up to 1000°F (538°C)
Chemical Resistance	Inert to water, oils, and alkalis.
Fast-Drying Film	Does not attract dust or other airborne particulates
Versatility	Also effective as an anti-seize compound and release agent

APPLICATIONS:

Use for engine assembly and break-in, hydraulic pumps, conveyor systems, automotive and industrial gaskets, vending machines, business machines, parking meters, tumbler locks, oven, furnace, and kiln mechanisms, any applications where a dry-film lubricant is required, and especially where extreme temperatures are encountered. Key industries include: Automatic Vending Machine Operators, Automotive Repair Shops, Industrial Machinery Manufacturers, Motor Vehicle Manufacturers, and Office Machines

COMPANION PRODUCTS:

Fast Gasket, Elec II Plus, Morado Super Cleaner, Extra, Zep 70(GreenLink), Shell Shock(GreenLink), and Cherry Bomb

SPECIFICATIONS:

Physical Form	Aerosol (liquid)
Color	Gray
Odor	Solvent-like
Flammability	Non-Flammable by CSMA Flame Extension
Shelf Life	1 Year Minimum
D.O.T. Shipping Label	ORM-D

PACKAGING:

20 oz can
