

FS FOAM-STA™

Concentrated Liquid Detergent, Foam Booster and Stabilizer

DESCRIPTION

A blend of selected nonionic and anionic detergents, emulsifiers and foaming agents chosen for maximum detergency and wetting ability, foam stabilization and hard water tolerance.

FEATURES

- Boosts and stabilizes foam
- Unaffected by pH
- Boosts performance
- Neutral and non-reactive
- USDA authorized

BENEFITS

- When used through the proper equipment, it generates a thick, stable foam that clings to vertical and overhead surfaces.
- May be used with equal effectiveness in either highly-acidic or high-alkaline solutions. Also stable in chlorinated solutions.
- Adds wetting and penetrating power to any detergent solution. Also, foam applications extend contact time of detergent with soil, resulting in more complete removal of soil.
- Will not neutralize, react with, or otherwise adversely affect most solutions to which it is added.
- Authorized for use as an all-surface cleaner in all departments of federally-inspected meat and poultry plants.

APPLICATIONS

Use as a foam booster for alkaline or acidic detergents. Other uses include manual cleaning of slicers, choppers, conveyors, blenders and other such equipment in canneries, wineries, vegetable processing plants, breweries, and egg processing plants.

Authorized By U.S.D.A. For Use In Federally Inspected Meat and Poultry Plants.

A highly concentrated foaming cleaner for use in foam generating equipment. ZEP FS FOAM-STA produces a dense, stable foam which clings to overhead and vertical surfaces resulting in prolonged cleaning action.

ZEP FS FOAM-STA is an excellent cleaner and degreaser for light to medium duty cleaning in canneries, dairies, bakeries, seafood processing plants, wineries, vegetable processing plants, bottling plants, red meat and poultry processing plants, institutional kitchens, breweries, supermarkets, egg processing plants, and restaurants.

For Heavy-Duty Cleaning. Use ZEP FS FOAM-STA as a foam booster with any heavy-duty cleaner, either highly alkaline or highly acidic.

DIRECTIONS:

For Light to Medium-Duty Cleaning: Dilute 1 part ZEP FS FOAM-STA with 64 to 128 parts water. Apply to surface to be cleaned. scrub if needed, and rinse thoroughly with water.

As Foam Booster Additive to Heavy-Duty Cleaners: Prepare heavy-duty cleaning solution as per label directions for the particular product used. Add ZEP FS FOAM-STA to solution at 1 part to each 200 to 400 parts cleaning solution. Set up foaming device according to instructions and adjust until desired quantity of dry foam is obtained. Foam clings to surface to be cleaned (for vertical surfaces apply foam from bottom to top); allow foam to remain as long as desired, rinse thoroughly with high pressure water.

WARNING!

CAUSES EYE IRRITATION

Concentrate can cause eye irritation or inflammation. DO NOT swallow this product. Further information on the effects of overexposure is included on the Material Safety Data Sheet, which is available upon request.

Zep advocates limiting exposure to all chemical products. Wear tight-fitting safety glasses, especially contact lens wearers. The use of rubber, neoprene nitrile, or other resistant gloves is strongly recommended for prolonged use. Remove contaminated clothing promptly and DO NOT rewear until thoroughly cleaned. After handling, wash hands thoroughly with soap and water.

FIRST AID:

EYES: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention immediately.

SKIN: Flush contaminated skin with plenty of water. Consult a physician if irritation develops.

INHALATION: Move exposed person to fresh air. If irritation persists, get medical attention immediately.

INGESTION: If this product is swallowed, DO NOT induce vomiting. If affected person is conscious, give plenty of water to drink. Get medical attention at once.

IN CASE OF A LARGE SPILL: Absorb product on an inert absorbent material, such as ZEP-O-ZORB, and deposit in a sealable container. Rinse area well with water.
