

Touch-Free Markstone Dispenser

This dispenser was designed for environments with handcare protocols requiring touch-free dispensers:

Smart technology—an infra-red reader scans four times a second, making the longest wait for product only $\frac{1}{4}$ of a second.

Patented power-saving technology—operates on four D-cell batteries enclosed in a water-resistant compartment. Batteries will last over 100,000 dispenses.

May be used to dispense all Zep handcare products packaged in round liters.

Daily Hand Care

From high traffic restrooms in public buildings to individual bathrooms in small offices, Zep has the right products and dispensers for the application.

The Markstone system combines the proprietary Zep round one liter cartridge and proven pumps to reliably deliver lotion soaps, foaming soaps, hand lotions, and sanitizers.

The durable Markstone dispenser, with its faux stone finish and contemporary design, mounts easily to tile, mirror, or sheetrock.

Each Zep round one liter cartridge comes with its own dispensing pump and was designed for maximum product usage.
