DYNA 143

Prod.# 0366

Solvent Degreaser

- Low evaporation rate and vapor pressure assure minimal evaporative loss
- Higher flash point(143°F) as compared to mineral spirits (107°F), reduces flammability hazards of solvent use in the shop area and store room
- Economical, as it uses virgin solvent – when used in a filtered Zep parts washer, such as the Dyna Brute FB, the solvent is continuously recycled, while particles and oils are trapped in filters for disposal – this also alleviates the need to have waste solvent picked up and disposed of on a regular basis
